 - Dries more quickly than other radiant barrier products
 - Promotes breathability
 - Prevents glue from clogging flow channels
 - Does not create a vapor barrier

- Excellent opportunity for margin enhancement
- Cost-efficient way to meet codes
- Installs like conventional roof sheathing – no additional labor
- Increase the value of your homes to consumers
- Energy efficient product
- Qualifies for Green Building credits
- May qualify for utility rebates and government tax credits
- Can potentially reduce tonnage of HVAC system
- Cuts air conditioning bills up to 17%
- ENERGY STAR® certified

- 20-Year Transferable Limited Warranty
- Includes coverage of foil delamination

TECHSHIELD[®]

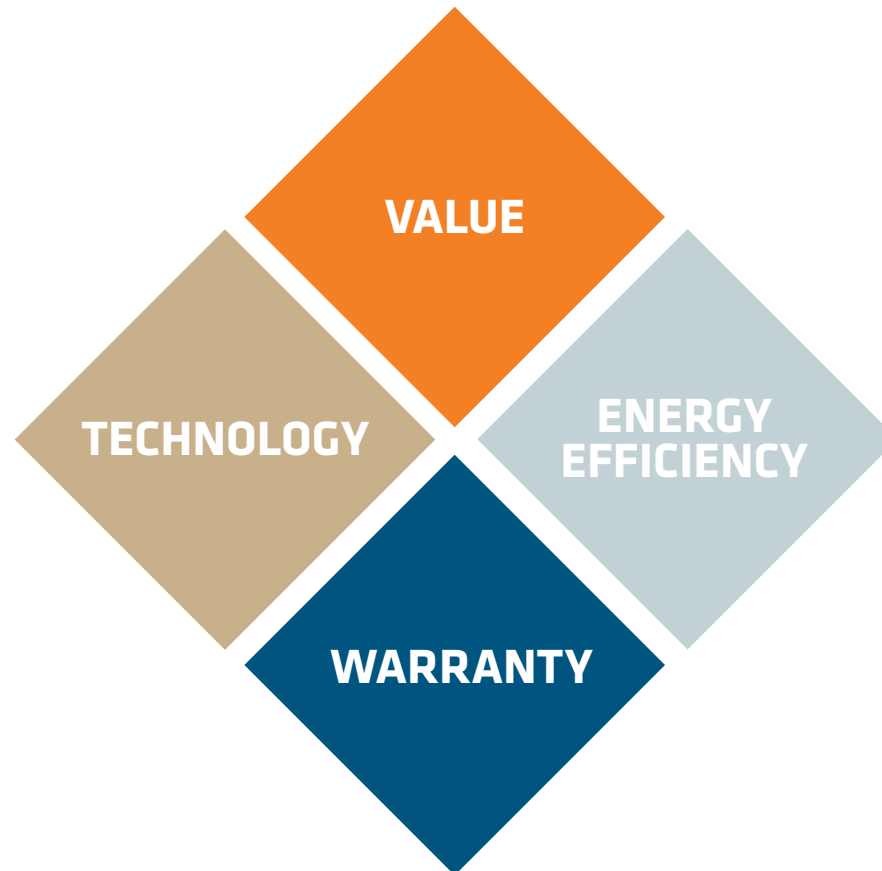

RADIANT BARRIER

- America's #1 brand of radiant barrier sheathing
- The original radiant barrier sheathing
- More than a decade in the market
- On more than 1 million homes
- Installs like conventional roof sheathing – no additional labor
- Savings start immediately
- Enhances value of the home

**Simple concept,
tremendous benefit:**

- Thin, durable sheet of aluminum laminated to LP OSB sheathing
- Blocks heat in roof sheathing from entering the attic
- Lowers attic temps up to 30°F in the summer
- Used in residential roofs for over 10 years

LP TechShield is good for the environment:

- Cuts air conditioning bills up to 17%
- ENERGY STAR certified
- Reduces heat load on air handling system in attic
- Uses wood certified under the Sustainable Forestry Initiative

- 20-Year Transferable Limited Warranty
- Transfers if you sell your home
